DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 26 January 2009 has been entered.

Allowable Subject Matter

2. Claims 1-37 and 39-41 allowed.
3. The following is an examiner's statement of reasons for allowance:
4. With respect to independent claim 1, the cited prior art, Bradlee et al. (US 2002/0161624 A1) and other prior art, fail to teach or suggest a combination as claimed wherein "the primary server is further adapted to use the data processing application to generate first analysis results specific to the first processing plant from the first process control information and send the first analysis results to the first processing plant via the open network and to use the data processing application to generate second analysis results specific to the second processing plant from the second process control information and send the second analysis results to the second processing plant via the open network." Claim 1 and corresponding dependent claims are therefore considered allowable over the cited prior art.

Art Unit: 2442

5. With respect to independent claim 20, the cited prior art, Bradlee et al. and other prior art, fail to teach or suggest a combination as claimed wherein “a plurality of process plants that are remotely and communicatively coupled to the cluster of redundant servers via an internet, wherein the plurality of process plants is associated with a plurality of business entities, and wherein the cluster of redundant servers is adapted to execute a data processing application that processes information originated by devices of the plurality of process plants and generates independent analysis results for each process plant from the information originated by the devices of that plant that are accessible by a user via the internet.” Claim 20 and corresponding dependent claims are therefore considered allowable over the cited prior art.

6. With respect to independent claim 24, the cited prior art, Bradlee et al. and other prior art, fail to teach or suggest a combination as claimed wherein “remotely receiving information originated by devices of at least one of a plurality of disparate process plants associated with a plurality of business entities via an internet; processing the remotely received information using a data processing application stored on one or more of a cluster of redundant servers associated with a vendor business entity that is different from the plurality of business entities to generate analysis results for each of the plurality of process plants;” Claim 24 and corresponding dependent claims are therefore considered allowable over the cited prior art.

7. With respect to independent claim 35, the cited prior art, Bradlee et al. and other prior art, fail to teach or suggest a combination as claimed wherein the server is adapted to remotely receive first process control information originated by a device of

Art Unit: 2442

the first and second processing plants processing plant via the open network and remotely receive second process control information originated by a device of the second processing plant via the open network and to store a portion of the received first and second process control information in the data historian and wherein the server is further adapted to use the data processing application to generate independent analysis results for each processing plant from the process control information originated by the devices of that processing plant and send the analysis results to the remote user interface via the open network.” Claim 35 and corresponding dependent claims are therefore considered allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
